National Oceanic and Atmospheric Administration  
NATIONAL OCEAN SERVICE

Office of National Marine Sanctuaries

February 18, 2009

MEMORANDUM FOR: William Douros  
Director, ONMS West Coast Region

FROM: Maria Brown *MB*  
Superintendent, Gulf of the Farallones National Marine Sanctuary

Paul Michel *PM*  
Superintendent, Monterey Bay National Marine Sanctuary

SUBJECT: Monterey Bay and Gulf of the Farallones National Marine  
Sanctuary Advisory Councils' joint resolution on the issue of  
ocean acidification within west coast national marine sanctuaries.

On February 12, 2009, the Monterey Bay and Gulf of the Farallones National Marine Sanctuary Advisory Councils passed a joint resolution recommending a coordinated approach to ocean acidification issues with all five west coast sanctuaries through the West Coast Regional Office.

The Advisory Councils have requested this resolution be sent to the Office of National Marine Sanctuaries West Coast Regional Director, William Douros.

Attachment

**JOINT RESOLUTION OF THE GULF OF THE FARALLONES AND  
MONTEREY BAY NATIONAL MARINE SANCTUARY ADVISORY COUNCILS  
REGARDING OCEAN ACIDIFICATION AND WEST COAST NATIONAL MARINE  
SANCTUARY SITES**

*Whereas*, the Gulf of the Farallones and Monterey Bay National Marine Sanctuary Advisory Councils jointly recognize ocean acidification as a significant threat to the long-term conservation and health of sanctuary resources and qualities, warranting additional NOAA research, monitoring, education and outreach, and management action to reduce and mitigate its impacts.

Therefore be it resolved, the Gulf of the Farallones and Monterey Bay National Marine Sanctuary Advisory Councils recommend that the West Coast Regional Office take a leadership role in coordinating ocean acidification monitoring with the Pacific Marine Environmental Laboratory, other research laboratories, and other interested parties.

Therefore be it further resolved, the Gulf of the Farallones and Monterey Bay National Marine Sanctuary Advisory Councils recommend a coordinated approach to ocean acidification issues amongst all five west coast sanctuaries.
